

COVID-19

Requirements for tour groups

Kurrajong Recycling is now open for workshops and tour groups, in line with current COVID-19 Government requirements.

- Kurrajong Recycling is only able to accommodate 28 people in tour groups due to one person per two square meters physical distancing requirements
- Kurrajong requires temperature checks to be done on all visitors entering site, as well as the use of hand sanitiser
- A list of attendee names must be provided to Kurrajong Recycling prior to tours for contact tracing purposes. This list must be final as we cannot accept new attendees at the time of the tour
- Any individual who has flu/cold-like symptoms or has been identified as a direct or casual contact of a COVID-19 case is not permitted on site at Kurrajong Recycling
- All tour attendees must wear high visibility vests for the duration of the tour as well as maintain at least 1.5m physical distancing from other tour attendees and Kurrajong staff where possible. The vests and all personal protective equipment (PPE) used are washed or disposed of after each wear.
